

TOWER 155 PROVIDES AN ALL-INCLUSIVE COLLECTION OF AMENITIES

Compson Associates, Florida's leading East Coast developers, once again live up to their motto of, "luxury above all." Their concept provides residents of Tower 155 an all-inclusive collection of amenities featuring the latest technologies, making their homes even more luxuriously comfortable, all under one tower.

Boca Raton, FL – May 20, 2019

While featuring modern and deco public spaces with interiors designed by Steven G., Tower 155 will unveil a new and exclusive collection of residences, all equipped with smart building technology ready with tablet and smart phone access to optional unit control for lighting, drapery, thermostat, electronics and more. Residents will be able to enjoy the first floor resort-style swimming pool featuring private covered cabanas, as well as have access to an urban landscaped rooftop sundeck overlooking Mizner Park. They will also be able to take in the view in their preference of a hot tub, wading pool, bar, lounge area, outdoor yoga studio or exercise room.

Perhaps most attractive of all the amenities are those which will be available remotely. Tower 155 will provide its residents concierges that will offer services such as grocery shopping, concert booking and restaurant reservations to the most exclusive dining spots. Butlers will be available to attend most every need, while dog walkers will make sure pets are at ease, and valet makes arrival a breeze. Think hotel living, while at home.

"We're really proud of this latest development project; it has luxury written all over it and will feature top of the line features throughout the units," says James Comparato, President of Compson Associates. "We're always excited to see our properties come to life, and also meet and exceed the expectations of our buyers and surrounding community," he added.

Tower 155 will also have 24-hour security and video surveillance, a secure garage with controlled access parking, as well as a private shuttle for a night on the town to local establishments and businesses. When staying in, residents will be able to hold a meeting in the executive business lounge or in one of the many conference rooms. If work isn't on the agenda, the clubroom will be state-of-the-art with an AV/sound system and entertainment area as well.

"Compson Associates has designed Tower 155 to be the best downtown condominium address in Boca Raton," says James Comparato. "Best in design, best in innovation, best in technology, best in location, simply the best of the best in the marketplace." But really, the amenities speak for themselves.

About Compson Associates:
"To build with integrity"—that's what Compson Associates is all about. For more than 60 years and across the span of four generations, this philosophy continues to ring true.

Compson Associates has developed over 10,000 condominiums across America's East Coast, earning the firm its reputation of building "trophy properties" such as The Excelsior, an ultra-luxurious, oceanfront condominium on Boca Raton's "Magnificent Mile." In Boynton Beach, the firm made its mark with San Raphael and Villa Lago, where resort-style living meets city life in the award winning mixed use property known as Renaissance Commons. Next on the horizon is the anticipated Tower 155 which is promised to be the best downtown condominium address in Boca Raton.

Tower 155 will continue Compson Associate's tradition of building the highest quality product. From their hands-on approach to an unwavering sense of pride, it's no wonder they build remarkable real estate developments. Thanks to the firm's talent, dedication and experience Compson Associate's portfolio boasts over \$3 billion of development throughout South Florida.
